She is the Sarawak GH site leader for ASCO International Cancer Corps collaboration in the Project ECHO Neuro-Onco MDT.

Topic: Bridging the Gaps - ASCO ICC Project ECHO MDT in Land of the Hornbill

In this presentation, I will discuss the transformative impact of the ASCO ICC Project ECHO Neuro-Oncology Multidisciplinary Team (MDT) in the unique context of the Land of the Hornbills. This innovative volunteering initiative aims to bridge geographical and knowledge gaps by leveraging collaboration and shared expertise among medical oncologists, radiation oncologist, neurosurgeons, radiologists, pathologist and other specialists from different countries. I will illustrate how this model not only improves patient management but also fosters continuous learning and professional development among healthcare teams.
